SECTION 3 - SERVICE DESCRIPTIONS (continued)

Option 2

Option 2 establishes postalized peak and non-peak rate for all non-local calls.

Option 3

Option 3 establishes a peak/non-peak rate based upon the Customer's dialing pattern. For example, all calls made within a LATA dialing seven (7) digits will have a distinct rate from those calls made within a LATA dialing eleven (11) digits.

3.1.4.1 Per Minute Usage Rate: Rates are set forth in Section 7.

3.1.4.2 Timing of Local Exchange Calls

Unless otherwise indicated, all calls are timed in six-second increments and all calls that are fractions of a minute are rounded up to the next six-second increment.

For station-to-station calls, call timing begins when a connection is established between the calling telephone and the called telephone station.

For person-to-person calls, call timing begins when connection is established between the calling person and the particular person, station or mobile unit specified or an agreed alternate.

Call timing ends when the calling station "hangs up", thereby releasing the network connection. If the called station "hangs up" but the calling station does not, chargeable time ends when the network connection is released either by automatic timing equipment in the telephone network or by the Company operator.

7.6.7 Direct Inward Dialing (DID) Service

DID service is an optional feature which can be purchased in conjunction with Company-provided Basic Trunks or Digital Trunks. DID service transmits the dialed digits for all incoming calls allowing the Customer's PBX to route incoming calls directly to individual stations corresponding to each individual DID number. Charges for DID capability and DID numbers apply in addition to charges specified for Basic Trunks or Digital Trunks.

So the Company may efficiently manage its number resource, the Company, at its sole discretion, reserves the right to limit the quantity of DID numbers a Customer may obtain. Requests for 300 or more DID numbers must be provided to the Company in writing no less than five (5) months prior to activation. In addition, the Company reserves the right to review vacant DID stations or stations not in use to determine their utilization. Should the Company determine, based on its own discretion, that there is inefficient number utilization, the Company may reassign the DID numbers.

The Customer has no property right to the telephone number or any other call number destination associated with DID service furnished by the Company, and no right to the continuance of service through any particular end office. The Company reserves the right to change such numbers, or the end office designation associated with such numbers, or both, assigned to the Customer, whenever the Company deems it necessary to do so in the conduct of its business.
